

Wilson Mills Baptist Church Smithfield, NC

THE PROBLEM

Our customer had over 300 fixtures with a combination of high wattage halogens, T12 fluorescents and metal halides. Office, common area and sanctuary lighting were all included. Constant maintenance, high energy bills and poor light quality were the main issues that we wanted to address.

THE SOLUTION

The Victory Lights team designed and installed an LED system consisting of Philips LED lamps and Simkar luminaires. Virtually maintenance free with much improved light quality. Our client's first power bill after installation was reduced by an astonishing 50%!
